DETAILED ACTION

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the hydraulic motor and hydraulic lines, accelerating nozzles and decelerating nozzles must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

The objection to the drawings will not be held in abeyance.

2. Claims 1-27 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Applicant claims control means in the form of a propeller having a geometry causing the expelled jet of water to contract to a diameter smaller than that of the propeller. Applicant further claims a relationship of core areas between the propellers, however, Applicant has not adequately disclosed how such a control of the flow is achieved. The specification references the core and annular areas of the front propeller in its description, however it is unclear from the disclosure exactly what such annular and core areas of the front propeller may be. What defines the core and annular areas of the front propeller? Only the rear propeller has been adequately disclosed as having defined core and annular portions. The blade shapes as claimed are a critical part of Applicant's invention, and without complete and adequate disclosure of the claimed invention, one of ordinary skill in the art could not make and/or use same.

Applicant further claims accelerating and decelerating nozzles, yet has failed to adequately disclose same. How are such positioned in relation to the propellers, and how are such supported? What is their longitudinal extent in relation to the propellers, and what is the their size relationship to each other?

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 2-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, "the core area" lacks antecedent basis in the claims.

In claim 3, "the annular area" lacks antecedent basis in the claims.
